WHO WE ARE

Who is Habitat3?

First and foremost we are a certified AWS Partner. Our specialisation is helping businesses design, deploy, maintain and secure their cloud infrastructure. Habitat3's team of cloud experts understand the crucial need to align business goals with digital goals.

Our mission is to bring the power of the AWS Cloud to Australian small businesses.

Founded in Australia in 2002, we are still owned and solely operated in Australia, serving a national client base.

With over 20 years behind us working with SMBs, and specialising in cloud hosting for the last 15 years, it's no surprise that once we work with an organisation, they never want to let us go!

SERVICES

What we offer

Products and Services

We deliver robust cloud architectures that underpin your web applications with a focus on maximising security, resilience and availability.

Core Solutions

We help you secure your AWS, build new apps on AWS, migrate apps to AWS as well as manage and modernise existing AWS architectures.

ABOUT US

Why do our customers choose us?

Our experience means our customers benefit from tried and tested cloud architectures that help them reach their business goals faster and more cost effectively. We design, build and maintain cloud infrastructure that best suits your needs. We're here to help your small business build a cloud infrastructure that achieves more, scales further, and works smarter.

Benefits of working with us, include:

- » **Focus and Specialisation** – our experience means we deliver on time and on budget.
- » **Australian based** – local team, local hosting.
- » **Proven cloud architectures** – our tried and tested solutions deliver more for small business.
- » **Ongoing relationship** – our understanding enables us to support your business as you grow and scale.
- » **Value** – our automation and refined processes reduce your costs.

Habitat3 is an AWS Consulting Partner, a member of the Solutions Partner Program and holds AWS certifications including Cloud Practitioner, Solutions Architect, SysOps Engineer and DevOps Engineer.

GET TO KNOW US

Meet our team

Our team are all based in Australia and we have staff working across Sydney, Melbourne and Brisbane. This means we can quickly and effectively work with your team, with no delayed response time due to time zones.

Stuart Gravenor

**CLOUD SOLUTIONS
MANAGER**

Stuart is able to translate business requirements into cloud solutions. With over 20 years experience in the IT industry and AWS certifications in SysOps, Stuart understands small business priorities and objectives and can design a cloud architecture perfect for your use case. Stuart oversees the Cloud Infrastructure Management team at Habitat3.

Raghava Bandaru

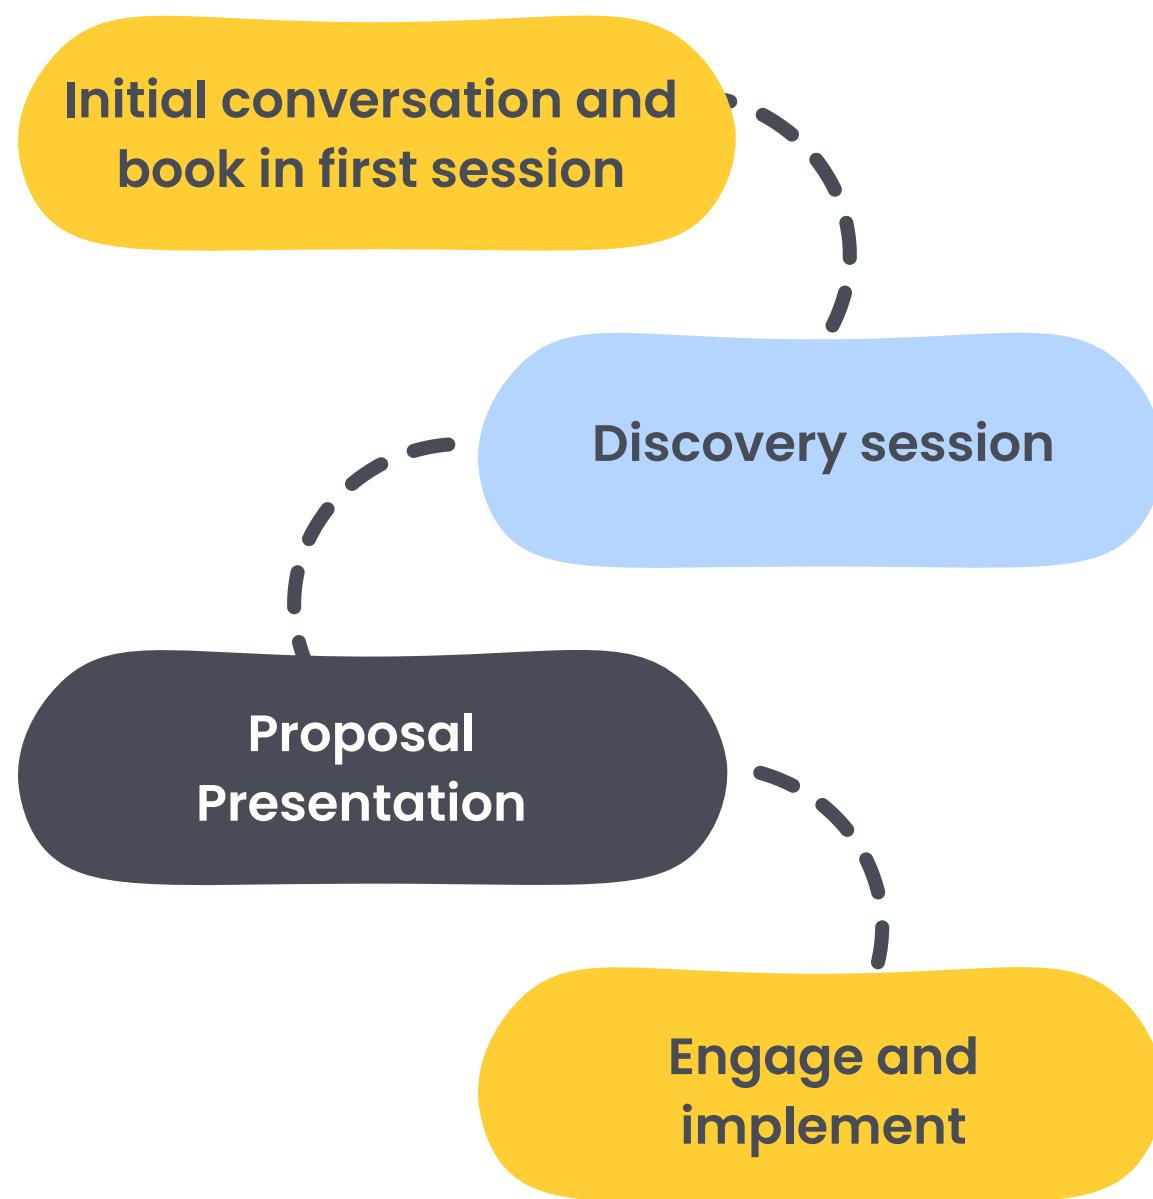

**SENIOR CLOUD
INFRASTRUCTURE SPECIALIST**

A highly skilled DevOps engineer with expertise in cloud automation, infrastructure management and CI/CD pipeline implementation, Raghava also has specific experience with optimising deployment workflows and enhancing the scalability and reliability of software development processes. Raghava and his colleagues oversee the implementation and ongoing management of clients' cloud infrastructure.

GET TO KNOW US

Engagement Process

When you work with us, we will spend time trying to understand your business, what has been happening prior to now, what systems currently exist and what your goals are both technically and for your business overall.

Who are our customers?

We work with clients in many industries including;

- » Healthcare
- » Education
- » Retail
- » Travel
- » Finance

We are Elemental

HABITAT3 HELPED AN INNOVATIVE, START-UP, ONLINE LEARNING PLATFORM TO LAUNCH NATIVELY IN THE CLOUD WITHIN A HIGHLY-AVAILABLE AND SCALABLE AWS WEB-APP HOSTING ENVIRONMENT.

We have been really happy with the way Habitat3 worked with our developer to ensure our needs were met. Habitat3's extensive knowledge of AWS and how to get the most from the AWS platform was invaluable. They also provide ongoing support to ensure the AWS services continue to meet our requirements.

— RADHIKA MATHUR
Founder, We Are All Elemental.

CoLab Lighting

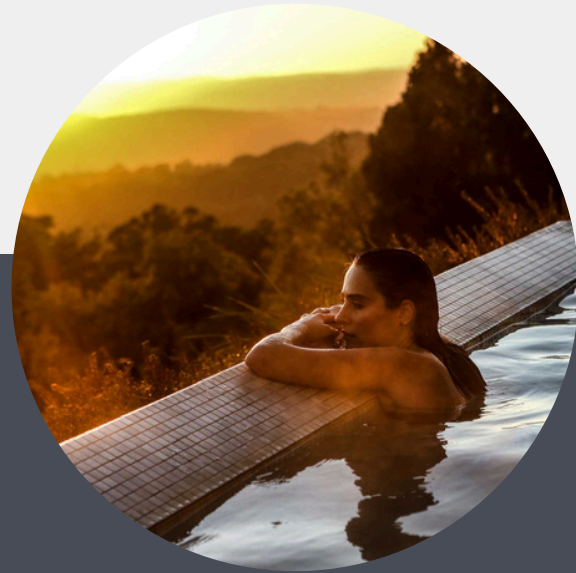

HABITAT3 QUICKLY MIGRATED AND OPTIMISED THE WEB HOSTING FOR A PREMIUM LIGHTING BUSINESS, GIVING THEM FULL CONTROL AND A STAGING SITE FOR TESTING NEW FEATURES, PRODUCTS, CLIENT FEEDBACK, AND BUG FIXES.

Habitat3, who are aware of our lack of understanding with some of these issues, are walking us through them as they appear. We're glad we have such reliable support.

— ADAM ADDARIO
Marketing Manager, CoLab Lighting

CASE STUDIES

The Tailor

HABITAT3 ENABLED DESTINATION MANAGEMENT COMPANY THE TAILOR TO BRING ALL THEIR WEBSITES WITHIN THEIR BRAND INTO AN AWS WEB-SERVER ENVIRONMENT THAT WAS SECURE, SCALABLE, HIGHLY AVAILABLE AND RELIABLE.

While I do have expertise in managing the sites, there are limitations to what I know but Habitat3 provided us with a step-by step guide that was tailored to my level of expertise – this enabled me to use the new hosting platform ongoing, and with relative ease. It was completely invaluable to have that kind of knowledge sharing.”

— LUCAS GONZALEZ,
Digital Marketing Manager, The Tailor

Safemate

HABITAT3 HAS ENABLED HEALTHCARE APP, SAFEMATE, TO CONTINUE TO GROW THEIR BUSINESS BY CREATING A MORE SECURE AND SCALABLE CLOUD PLATFORM.

One of the reasons we can do this sort of thing is because AWS is working well. And the reason for that is Habitat3. And when we get emails from AWS that require an action, Habitat3 are responsive to help resolve any issues.

— MICHAEL BARK
CIO, SafeMate
